	<b>FORMULA:</b> 1. Calculate each grade according to above planning factor in COLUMN A to result in a raw number for each grade level. 2. Sum the raw number for each grade level from COLUMN A. 3. Round up the total to the nearest whole number. 4. Calculate each grade according to the recommended maximum class size in COLUMN B and round up each raw number at each grade level to the nearest whole number. 5. Sum the rounded number for each grade level from COLUMN B to get the total.  If the total in COLUMN B is less than the total in COLUMN A, the final classroom teacher allocation is COLUMN B. Otherwise, the final classroom teacher allocation is the total from COLUMN A.

10. A new planning factor is added in FY 2017 for academic support for level 5 English language learners and will be phased in over a three-year period.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for this increase in the number of people employed in the public sector. One of the main reasons is the increasing demand for health care services. The population of the UK is ageing, and there is a growing number of people with chronic conditions who require long-term care. This has led to an increase in the number of people employed in health care, particularly in the public sector.

Another reason for the increase in the number of people employed in the public sector is the increasing demand for social care services. The population of the UK is ageing, and there is a growing number of people who require social care services. This has led to an increase in the number of people employed in social care, particularly in the public sector.

A third reason for the increase in the number of people employed in the public sector is the increasing demand for education services. The population of the UK is growing, and there is a growing number of people who require education services. This has led to an increase in the number of people employed in education, particularly in the public sector.

A third challenge facing the public sector is the increasing demand for education services. The population of the UK is growing, and there is a growing number of people who require education services. This has led to an increase in the number of people employed in education, particularly in the public sector.

There are a number of ways in which the public sector can meet these challenges. One way is to increase the number of people employed in the public sector. This can be done by recruiting more people to the public sector and by providing training and development opportunities for existing staff.

Another way in which the public sector can meet these challenges is to improve the efficiency of its services. This can be done by streamlining processes and by using technology to improve service delivery.
