

(Feedback from Apr 14-18) At the Career Center Site - Career Center's capacity increases with space for • Arlington Tech and • Addition of 1,300 seat Neighborhood High school*A 1,300 seat neighborhood high school may not be able to offer all of the activities, programs, and courses that are presently offered at Wakefield, Washington-Lee, and Yorktown.

Strengths	Challenges	Other thoughts
	Space constraints for a larger school once the County out grows the 1,300 seat need and is looking at 2,000+ seats.	
This makes better sense. Walter Reed is a wider street to handle traffic, with more wider roads nearby to handle traffic. The Career Center is located close to businesses that can handle the extra activity, not surrounded by neighborhoods.		
parking for career center and library can be put into a garage, spreads high schools out more	not sufficient space for full sports programs;	
Somewhat central	Small site	Please go to Crystal City where there is more room
Good location for neighborhood HS-interior of county and distant from other HS.	Similar to Kenmore option, to maintain equity students would have to be given the option to transfer to a comprehensive HS for sports, etc.	
tech program		change the tech program to be more comparable to TJ high school in Fairfax to draw interest.
Career Center and Tech sounds interesting along with new H. S.	Possibilities for activities would have to be considered.	There should be more space somewhere in North Arlington.
		I think adding a new neighborhood HS either here or at Kenmore HS is preferable to just making an existing school even bigger.
tech sounds great in theory	not sure how tech is working out ; hate busing all of these kids all over the county	same as above for another neighborhood school
	Assumes a lot of people want specialty programs we need a fourth neighborhood high school.	I don't think option really holds the prospect of a regular neighborhood high school.
Great central location	Not a big site unless the existing Patrick Henry ES was incorporated	

**(Feedback from Apr 14-18) At the Career Center Site - Career Center's capacity increases with space for • Arlington Tech and • Addition of 1,300 seat Neighborhood High school*
A 1,300 seat neighborhood high school may not be able to offer all of the activities, programs, and courses that are presently offered at Wakefield, Washington-Lee, and Yorktown.**

Strengths	Challenges	Other thoughts
Seems like a good option as it would give the HS its own space while allowing Arlington Tech location	Does this location match the need of where the students are currently overcrowded? or estimated to be in the future?	Not sure how the boundaries would be redefined given the proximity to Wakefield HS
Tech is really important especially trade for those kids who just are not academic... but would excell at a trade and practical learning.		
This is a good location.		A tech and neighborhood school could work in the career center site.
	A pipe dream if APS thinks that they will fill the enrollment hopes.	The only way to meet the enrollment objectives is to make the comprehensive high school experience so unappealing that parents select it to escape the other schools. I would note that knowlegable sources on sites like DC Urban Moms have indicated that the recent increase in private school applications is being driven by Arlington families wanting to get out of the APS. Both the APS and the Board should reflect on this.
Geographical balance from other county high schools, less disruption to existing school sites		
none	Too many school sites in one neighborhood (arlington heights), Costs could be high with new fields and buildings, fear that existing programs at career center will get kicked out, terrible traffic impact	worst option
Near 66 so location is good for traffic. Students could go to other campuses for other activities/courses just like college setting. We need to think outside the box on this one. I am also for locating schools in already existing structures, office buildings that are currently not occupied	I would like to see the list of activities that would not be covered and the reasons why.	

(Feedback from Apr 14-18) At the Career Center Site - Career Center's capacity increases with space for • Arlington Tech and • Addition of 1,300 seat Neighborhood High school*A 1,300 seat neighborhood high school may not be able to offer all of the activities, programs, and courses that are presently offered at Wakefield, Washington-Lee, and Yorktown.

Strengths	Challenges	Other thoughts
capacity at Arlington Tech increases	benefits of all other HSs not available at new school/has to be choice school	equity issues if you make this a neighborhood school; too much construction in one area (S.Arl)
	Too dense already	
		Consider neighborhood hs in the HB model
We need a tech school and something for students other than bookworms		
Increased Capacity for Arl Tech.	All neighborhood high schools should offer the same activities, courses, etc... You run the risk of creating a second tier school	
	This does not seem to be enough space and again we are still stuck with ONLY 1300 seats.	
Arlington Tech is a great idea and will see high demand if done well. You would be smart to expand that now and work for that. Also, could reduce tuition paid for TJ in Fairfax	Again, a new building may be more expensive than an academy, and less flexible.	
Existing APS property that can accommodate a new HS; does not overcrowd any of existing HSs.	Is there enough demand to expand Arlington Tech?	This is a good backup option to the Kenmore site - please analyze these two options to decide on best solution for students
	I don't understand how it would make sense to have two HS adjacent to each other	
Location of the Career Center.	May not be able to offer all of the programs, activities, and courses of the three existing Arlington high schools.	
	not enough space for this	
Alleviates burden on local schools. Most facilities already exist.	Lack of programs.	
	See above. Students should not be shortchanged by a school that will not have as much to offer as the other comprehensive high schools. Does not address demand for IB.	
Central location	So little space, such limited facilities	

(Feedback from Apr 14-18) At the Career Center Site - Career Center's capacity increases with space for • Arlington Tech and • Addition of 1,300 seat Neighborhood High school*A 1,300 seat neighborhood high school may not be able to offer all of the activities, programs, and courses that are presently offered at Wakefield, Washington-Lee, and Yorktown.

Strengths	Challenges	Other thoughts
Career Center building is old and in desperate need of a new building; Arlington Tech students could take some classes at the new neighborhood school	Rebranding the Career Center and ensuring that the new neighborhood high school will be a draw for new students	
This is a good location--would balance siting of high schools in the county	if this is a smaller school, what will be unique about it to allow it to compete with larger schools?	Expanding vocational ed options would serve the needs of many students
	This will make the demographics at Wakefield even more skewed by taking the richer half of its attendance area, pushing wakefield boundaries into the poorest part of WL area.	Might also disrupt the apparent momentum of the Arlington Tech program, which seems to be generating a reasonable amount of interest.
By definition above, the Career Center site is too limited in what it can offer. Why shortchange ANY students by putting the high school there?	This site already has THREE schools on it. Enough already. The quality of those three schools is bound to suffer when 1300 more students are crammed into the site.	Do not shortchange the students who already attend one of the THREE schools at this
short commutes to school = more time for everything else	kids are basically in competition with one another when applying to college. it would be terrible for a child to not have an opportunity to develop an interest or skill because it isn't offered at their neighborhood school.	
	Arlington Tech is an unproven entity and should be thoroughly evaluated for effectiveness before proceeding	
	Space, traffic	Why will it be doable to expand to create a highschool when we were told it was to small an area for an expanded elementary
	Not for everybody. Bus service needed	Won't solve the bigger capacity issue.
Using existing space- less expensive than building new high school.	Redistricting. What makes this appealing if its offerings are limited?	
Building a new high school	Not giving the new high school a focus as a countywide option school	The new high school could be a countywide option school focusing on vocational/technical education

(Feedback from Apr 14-18) At the Career Center Site - Career Center's capacity increases with space for • Arlington Tech and • Addition of 1,300 seat Neighborhood High school*A 1,300 seat neighborhood high school may not be able to offer all of the activities, programs, and courses that are presently offered at Wakefield, Washington-Lee, and Yorktown.

Strengths	Challenges	Other thoughts
Student can easily take Arlington Tech classes	Still no sport or music options. There are no fields. What do the kids do for PE?	Build a parking garage with a field on top
should be enough space with a parking garage, students could use career center	too close to elementary school	
1300 seat HS would complement Arlington Tech and with both at the same site, some economies of scale could be realized for activities.	There is already a lot going on at that site with Patrick Henry, Career Center, Arlington Tech	
good idea	don't know the career center's purpose/mission	
		Why CAN'T APS ensure that this new, smaller 1300 seat HS would have all the same programs, activities and courses that the other APS HSs have when lots of smaller districts around the country are able to offer a diverse body of activities with smaller student bodies?
Best option!		
Properly located to balance diversity		Best option to adress diversity.
New High School is in the offering, which is what Arlington needs.	This option, regardless if built at Kenmore or another location, should offer the same education offerings as the sister schools (i.e. Wakefield, Washington-Lee and Yorktown.	Have you considered space for sports grounds.
Like adding additional neighborhood school	Will the seats be where they are needed?	
I don't understand the utility of three distinct high schools on one property – it seems confusing for parents, students, and the county. But a new full-size high school – particularly in that area – would be very useful for the growing population in Central and South Arlington.	Parents may have concerned about the number of students in a fairly small space, in addition to concerned about students who are already legally adults mingling with ninth graders.	
?	Too many kids on tiny space. Promotes Choice schools which are not effective at relieving overcrowding and degrade diversity.	No more choice schools.

(Feedback from Apr 14-18) At the Career Center Site - Career Center's capacity increases with space for • Arlington Tech and • Addition of 1,300 seat Neighborhood High school*A 1,300 seat neighborhood high school may not be able to offer all of the activities, programs, and courses that are presently offered at Wakefield, Washington-Lee, and Yorktown.

Strengths	Challenges	Other thoughts
Arlington Tech expansion is very desirable and an expanded school at this site is a great option. Transportation efficiency. South Arlington location would mean 2 High Schools in South Arlington.	Can't think of any.	This is absolutely the best option. We need a significant STEM focused high school in Arlington.
Naturally able to incorporate non-traditional HS activities/courses at site	Site seems already crowded; adding to building probably more disruptive to current students	Would be nice to incorporate and improve library too and make a more cohesive campus
Smaller high schools have lots of benefits for kids, including the chance to be "known"		Another neighborhood high school means fewer kids needing buses
	1) Far too much APS presence in such a small community, with the addition of the largest ES in Arlington on top of likely-to-be-expanded TJ. 2) Community relies on the library - no credible assurance the library will either be untouched or remodeled in the new build, 3)	So disappointed in the county and school board for pulling the wool over citizens eyes and denying an addition for Patrick Henry at the Henry site.
		Would this be an expansion for technology? Sort of like TJ in Fairfax County?
Maximizes land use. Could pool funding of 1300 + ArlTech and make it a 4th comprehensive with ArlTech as an option (.just like IB in WL)	Two choice programs using precious land when the same land and funding could pay for a fourth comprehensive.	Save this option for the future when we have 40,000 students
Very dense area, might be well served by a neighborhood school.	Traffic, affect on the neighborhood.	
Better then Washington and Lee because there is more space, but not as much as Kenmore.	There is limited space available and program already located here. The current plan assumes 800 seats located at the Arlington Tech program, so I am not sure homemaking a 1300 seat school here makes any improvement. It is only a net gain of 500 seats.	
Limited residential impact.		Make education center hub for extra-curricular like studio arts, foreign language, and IB

(Feedback from Apr 14-18) At the Career Center Site - Career Center's capacity increases with space for • Arlington Tech and • Addition of 1,300 seat Neighborhood High school*A 1,300 seat neighborhood high school may not be able to offer all of the activities, programs, and courses that are presently offered at Wakefield, Washington-Lee, and Yorktown.

Strengths	Challenges	Other thoughts
Already adding on to the site to expand Tech, good to have access to Career Center electives	Not access to existing high school programs/activities	Seems like a viable option, can students sign up for activities at another high school?
		Having ~ 4000 students total in the W-L area should have been a non-starter.
	A vocational high school (and its students and teachers) sharing the same building as a regular high school? School culture clash?? How will staff and resources be divided over time as the populations of each program fluctuate?	
None	The traffic in Arlington Heights is already a disaster just waiting to happen. With the new elementary school going in @ TJ, South 2nd St, Highland and Fillmore will be a dangerous parking lot all day long.	I can't believe this is even being considered. Obviously the board members are either totally ignorant of the Arlington Heights neighborhood or just don't care about us.
Well located; good traffic flows; provides best option for largest portion of Arlington students.		
Central location in county	No opportunity for sports and p e	Good choice
Smaller, neighborhood high schools offer many benefits.		
Best option. STEAM option with tech focus would be best for preparing students for future.	Transportation	
Expanding Tech program is good.	No space for stadium, fields, pool, etc.	
	Too small of a space.	We need a 4th comprehensive high school. Please stop ignoring the demand for this.

(Feedback from Apr 14-18) At the Career Center Site - Career Center's capacity increases with space for • Arlington Tech and • Addition of 1,300 seat Neighborhood High school*A 1,300 seat neighborhood high school may not be able to offer all of the activities, programs, and courses that are presently offered at Wakefield, Washington-Lee, and Yorktown.

Strengths	Challenges	Other thoughts
The Career Center location would give students easy access to the wonderful programs there. It is also a site that provides multiple smaller programs so they are accustomed to sharing space.	Too many programs already share space. There are too few mental health professionals in the building to serve the many different programs. It is impossible to expect the leader of one program in the building not to become frustrated with whomever is responsible for the entire building.	
HB Woodlawn type HS. If the county wants smaller class sizes, this is a good place to start.	If the county wants to create another HB Woodlawn type HS, then how to convince families to attend if our current South Arlington HS is not at 100% capacity.	Why not take this opportunity to branch away from our commitment to Thomas Jefferson High School for Science & Technology and position the new school as our commitment to advanced High School Education. Arlington already has neighborhoods that believe we are second to none. Arlington High School graduates are marginalized by our own State Universities when it comes to acceptance, but TJ graduates seem to get first choice and they brag about it.
Like W-L - this could be a good central location for transit purposes	Space	Again, if this H.S. does not include same programming as other comprehensive schools, then it should be an options program like more IB or another HBW.
already high school students located there		
	Space; limited programming for some kids, which is not fair. If APS isn't proposing the HS as an option program, tax dollars shouldn't go to providing less than a fullhigh school experience for a small number of kids as a default (and possibly only option) high school.	
I think the community is in favor of a comprehensive high school.		

(Feedback from Apr 14-18) At the Career Center Site - Career Center's capacity increases with space for • Arlington Tech and • Addition of 1,300 seat Neighborhood High school*A 1,300 seat neighborhood high school may not be able to offer all of the activities, programs, and courses that are presently offered at Wakefield, Washington-Lee, and Yorktown.

Strengths	Challenges	Other thoughts
If you gut the career center building, and fold in ACHS, that could be a BIG space for a real high school!	Arlington Tech...well...lame.	
Best Option		
Reduces overcrowding at Washington-Lee	This is not a comprehensive high school and students will not have all of the opportunities available at the three comprehensive high schools	
This is the best option for a new/fourth high school. The space is available, and the community supports it.	Getting it done in a timely fashion due to moving the current elementary students to a new school.	This is where the most growth is in Arlington with regards to students. Provide the necessary space.
Area is located more centrally in Arlington County and potentially reduces transportation issues. Co-location with Arlington Tech would appear to add value to the high school for it's students.	No comment	
There is more space and the facilities are great. Tech schools should be expanded.	Again worry of increasing concentration of low SES students in south arlington.	
None	Same as mentioned for kenmore location.	
	Same challenges as above, but it may not have the same horrific traffic issues, nor the problem of cramming K-12 students together in a single location.	
small environment	Lack of full comprehensive school amenities.	
APS needs a new neighborhood high school, not one with limited programming and study options	Providing activities. programs, and courses that the other high schools have either with online courses, busing to other high schools, etc.	
location	space	
Space is currently underutilized, BUT see "other thoughts"	Inadequate outside space and sports facilities for students?	Neighborhood goodwill is rapidly becoming nill--we were told the space could not grow for elementary and what about the traffic implications!

**(Feedback from Apr 14-18) At the Career Center Site - Career Center's capacity increases with space for • Arlington Tech and • Addition of 1,300 seat Neighborhood High school*A
1,300 seat neighborhood high school may not be able to offer all of the activities, programs, and courses that are presently offered at Wakefield, Washington-Lee, and Yorktown.**

Strengths	Challenges	Other thoughts
location is good to absorb this number of students,	* may not be able to offer sports and other programs - equity issue with other high school	
Could add large number of new walkers, on a transit line, could interact well with career center (possibly saving money of busses back and forth from home school),	need more info on the type of program that would be proposed	Other strengths, could combine sports teams with arlington tech, could act as swing space if AT grows, great opportunity to work with county to provide gym, tennis and our basketball courts, theater and maybe pool to much needed area, this space would appear less appropriate for a future middle or elementary school, could be diverse student body
combines arl tech with new program - might draw more kids to arl tech	as with Kenmore site - not fair to turn this into a neighborhood school if it isn't going to offer all courses/programs	If here, should only be an option/choice school or have a county wide lottery.
	There are already too many schools in one very small neighborhood. Roads are not designed for this much traffic and no room for expansion.	
location is not bad and probably would be very walkable	no space for fields, a pool, etc.....would be hard to make it comparable to the other three comprehensive schools	
Good location		I'm not sure how much room is available at this location but if there is sufficient room then I think it's a very good option.
We need to keep the career center program. We need a new HS but that can be done at Kenmore as a comprehensive program. Easy and done	too much at that site	
		I support.
Adds capacity without overcrowding	Students may not have access to the same level of education and experiences if activities, programs and courses are limited.	

(Feedback from Apr 14-18) At the Career Center Site - Career Center's capacity increases with space for • Arlington Tech and • Addition of 1,300 seat Neighborhood High school*A 1,300 seat neighborhood high school may not be able to offer all of the activities, programs, and courses that are presently offered at Wakefield, Washington-Lee, and Yorktown.

Strengths	Challenges	Other thoughts
Arlington needs a tech focus HS	How are you allowing students to apply? This should be an equivalent to TJ, there's absolutely no reason, other than the school board's shortcomings, that Arlington doesn't already have one. This should be an application/ score based school. There should be an elite school here	
Adds seats in a growing area of the county...	I don't think the space would be adequate for a HS.	
EXCELLENT idea- there is a lot of land here, and resources already here, this is in a very walkable area (Henry/TJ/Career Center is very residential)	relocating library, space for outdoor areas	
Located in South Arlington, accessible to public transportation, may encourage development of more creative/workforce development curriculum.	Not traditional , gives the impression that seats are just an add on to the tech school, may threaten APS brand of high achieving school district.	May be a potential site for additional HILT and adult learning hybrid models
We need a 4th comprehensive neighborhood school	New school needs to support full range of activities -- it can't be a 4th rate choice	Consider other spaces for arlington tech - like the VA Hospital site
Central location-perfect for boundary changes and diminishing the "North/South divide" perception w/in APS; creates a high school campus; allows for shared facilities/budget with Arlington Tech/CC/ACHS; replaces aging buildings and revamps the site - a plus for the neighborhood.	Acreage - would need alternate locations for fields and/or pool (but some amenities would have to be onsite to placate neighbors!), Cost- Would need to find another place for Montessori, would Henry be a tear-down? Parking-would need to be undergrounded to allow for some greenspace onsite; Traffic - Walter Reed/Columbia Pike are main access arteries, lot of schools/seats in a single neighborhood.	I like this location best, but it would require a lot of co-planning with Arlington Tech and creativity to share facilities between the schools. I think the neighborhood opposition will be tough here, but could be placated with some good amenity options--don't try to offer nothing! here else can Montessori go? Kenmore? It is half the size of the HS seats needed, so it would be less burden on Carlin Springs Dr.
good location	won't offer same activities	
Increasing capacity for Arlington Tech, a niche program, is a good thing.	Lacks comprehensive school, enrolled students are at disadvantage compared to other high schools.	

(Feedback from Apr 14-18) At the Career Center Site - Career Center's capacity increases with space for • Arlington Tech and • Addition of 1,300 seat Neighborhood High school*A 1,300 seat neighborhood high school may not be able to offer all of the activities, programs, and courses that are presently offered at Wakefield, Washington-Lee, and Yorktown.

Strengths	Challenges	Other thoughts
The location seems to be nearly set up for specialized high school programming, it is well located,	The space seems very tight--not much open space	This location could be the S. Arlington equivalent of HB Woodlawn.
	a neighborhood school high school that doesn't offer all/most of the activities, programs and courses that the other 3 HS offer would be seen as a disadvantage, these students didn't have a choice to pick this school, it was their neighborhood; they are disadvantaged if they don't get access to the same clubs, arts, sports etc. as others	Why not expand Arlington tech to be a full STEAM or STEM experience? (and still allow students from other HS to participate in the "tech" component as they do today;
None. Landlocked site in a neighborhood not connected to any arterials.	Many. Will take an overly full site and add another big structure. Not enough room for many things starting with parking.	How can a site that was too constrained for a new elementary school be big enough for a larger HS? This does not make sense.
	Construction Impact on existing program	
Love the idea of more smaller schools in the county		
	This site will only work as a high school if the elementary school building is removed.	I would support this site for a high school if the library is kept and if the high school is the only other facility on the footprint that includes the current elementary school building and the career center. In other words only one school.
Space	Seats are not where seats are needed	Again, a smaller neighborhood school that doesn't offer consistent services is not equitable to taxpayers.
There is space for expansion and it is close to transportation options		
	Not centrally located to where excess student population resides. Thus, will decrease walking and biking and increase need for busing.	
	we still don't know if anyone will like Arlington Tech, it's not been around long enough to evaluate	oppose

**(Feedback from Apr 14-18) At the Career Center Site - Career Center's capacity increases with space for • Arlington Tech and • Addition of 1,300 seat Neighborhood High school*
A 1,300 seat neighborhood high school may not be able to offer all of the activities, programs, and courses that are presently offered at Wakefield, Washington-Lee, and Yorktown.**

Strengths	Challenges	Other thoughts
I think this could be an option offering an 'alternative' to a traditional highschool	may not have enough interest if a choice program	
An expanded site here provides a lot of flexibility. It could expand or contract depending on the success of Arlington Tech. It could also facilitate more students taking classes at the Career Center, since they would not be forced to lose a period to transport.	Same comments as for Kenmore site. There are plenty of possibilities here beyond "a neighborhood school without the offerings of the other schools".	The discussion of facilities needs to be bigger than just for the new 1300 seat school. The current schools do not have sufficient practice fields for their existing teams. We need more creative solutions. How about a single Arlington Stadium to be shared by all the schools? Then use the space of the current three stadiums for more practice fields with a small amount of seating (enough for most sporting events).
An excellent idea, especially if the new high school focuses on practical skills learning.		
Choice program already there	Few will want to go there if it's not comparable to the other three schools	Bad idea overall - you would be creating a second-class experience for some APS students
	Kids need athletic fields.	
Fairly large footprint for a school building. Could also utilize the field space at TJ to meet some of the athletic needs.	Potentially large impact on local neighborhood traffic.	
	Building a school that cannot offer comparable programs, activities and courses is unfair to the students who to there. I suspect there will be pressure to add offerings over time in a very expensive way.	
Better than the Ed Center option	Worse than the Kenmore option	
Same issue as above: the neighborhood might benefit from having a local high school	Same issue as above: if the new 1,300 seat high school can't offer all of the activities, programs, and courses that are presently offered at Arlington's 3 existing high schools, the new high school will be relatively unattractive to students and parents	
better than Educ. Center option	will need to be creative so that the same activities, courses can be offered	

(Feedback from Apr 14-18) At the Career Center Site - Career Center's capacity increases with space for • Arlington Tech and • Addition of 1,300 seat Neighborhood High school*A 1,300 seat neighborhood high school may not be able to offer all of the activities, programs, and courses that are presently offered at Wakefield, Washington-Lee, and Yorktown.

Strengths	Challenges	Other thoughts
I don't see any strengths with this option.	It doesn't address the real need for building a 4th high school.	
tech is a good idea		
		Appears to be the biggest change.
	Less likelihood that this site could eventually be used for a comprehensive high school when compared to the Kenmore site	
None		
Prevents overcrowding of space and amenities	Convincing people to send kids to this satellite school.	
	No way to guarantee that you will have enough kids wanting to enroll in the Arlington Tech Program. You will still end up with overcrowding in the high schools.	Stop focusing on "choice schools" and just build a comprehensive high school.
Smaller learning environment	I sense that Arlington Tech is meant to compete with TJ in Fairfax, but building that kind of reputation will take decades.	
This should be the location of a high rigor S&T program that will draw from all across the County. It would not require all of the resources of a comprehensive HS, similar to how HB operates. The current Ark Tech program is severely mis-aligned with the county needs.	Use the Patrick Henry elem space and people will freak out over the loss of the new program. But it needs that whole space.	A blue chip S&T program would be a huge asset for APS.
None. Why can't it be a program if it's here? Make it a choice if you can't offer same amenities.	I don't understand why it has to be neighborhood zoned if it's here?	This is all really dumb. WHY WOULD IT HAVE TO BE ZONED AND NOT A PROGRAM SCHOOL IF IT'S HERE?!? Just tell us that you already made up your minds about W-L and quit with this BS community input.

**(Feedback from Apr 14-18) At the Career Center Site - Career Center's capacity increases with space for • Arlington Tech and • Addition of 1,300 seat Neighborhood High school*A
1,300 seat neighborhood high school may not be able to offer all of the activities, programs, and courses that are presently offered at Wakefield, Washington-Lee, and Yorktown.**

Strengths	Challenges	Other thoughts
	I am concerned about the asterisked comment. Would students be required to attend this neighborhood high school? If so, it is a disservice and disadvantage to not allow those students the same opportunities as students attending the other 3 high schools.	
Better than the Ed Center I guess.	Not clear building can really accomodate this. Can't be turned into a comprehensive.	
	The asterisk noted above	I think it's critical that APS does whatever it can to ensure that a neighborhood high school at this location CAN offer all of the activities, programs, and courses that are presently offered at Wakefield, Washington-Lee, and Yorktown.
Might sound better than nothing.	The facility/site would require vast resources and at the end would fall short of the experience provided by building the fourth comprehensive HS the county OBVIOUSLY needs.	Build the fourth comprehensive high school the county OBVIOUSLY needs. It's time to lead or get out of the way, because failure in this imperils my child's education.
