Guaranteed Admission Preference Challenge

I support this. Why should Abingdon get preference over say, Barcroft? And Key is perfectly situated to be 1 of 2 Immersion choices. The "neighbors" don't own rights to an option school.

Key is under capacity. Why does Arlington need 2 language immersion elementary schools?

as a North County Clarendon parent,

I agree w/ proposed change -> no pref for neighborhood team

Taylor, ASF are crowded if Key is countywide there will not be enough room for neighborhood kids at Taylor + ASF - or need a 3rd neighborhood buildg

YES - get rid of special rules. Use zones or countywide

The Taylor/ASFs schools are already over capacity, why not convert Key to a neighborhood school vs adding enrollment stress to ASFs + bussing more kids to Key from other parts of county

Guaranteed Admission Preference Strength

Guaranteed Admission Preference Challenge

Yes!
No more preferential admissions!
Give all a chance in a lottery.

• How can you make all these changes w/o figuring out impact first?
• If all ASFS/Key/Jonestown/Taylor at capacity how can there ever be a neighborhood or sibling transfers

Yes, Campbell has no parallel for northern Virginia families. Please make it countywide.

SFS is going to be way overcrowded. And no one will want to go to another school from that area by force. One option to give them preference to option schools to alleviate crowding.
Or build a school tenton on Buck Property.

"County-wide" options should mean just that, not carving out special neighborhoods that can also get preference

The crisis is seats not options

Guaranteed Admission Preference Strength

Guaranteed Admission Preference Challenge

REMOVE CLUSTER OPTION FOR CLAREMONT-
The guaranteed cluster takes up all of the spaces and siblings have ended up on wait-list - other neighborhoods

Key school ops - covets, lottery w/o boundary preference will increase enrollment at Key - High Taylor Schools which are already over capacity. Table the open enrollment until capacity issues are addressed because importing more students will cause cascade of problems.

NO NEIGHBORHOOD (GUARANTEED) PREFERENCE FOR OPTION SCHOOLS!

Where will you find all of the neighborhood seats needed then? Make either FTS or Key a neighborhood school, and put the people (unemployed or FTS at Reed).

Strengths of randomly guarantee allows more access to a more diverse group of students.

The guaranteed clusters block out students from the more diverse neighborhoods in the county.

no makes four rows and is well of more fair for make sure only Claremont neighborhood elsewhere -

Guaranteed Admission Preference Strength

Makes available options equitable for all families

Guaranteed Admission Preference Challenge

Turn Buck Property into part of ASFS so it is a neighborhood & key zone school
