

## HB Woodlawn Lottery (March 30 Post-its)

CHALLENGES	CONSIDERATIONS
Why not at-large slots? Why school based?	How does ES vs zone impact MS diversity? If options schools have different demographics than neighborhood zones could diversify inadvertently be reduced?
Keep current allocation -> options school lottery needs to reset so more kids have a chance to attend at some point in their APS career.	Why no set-asides for F/I? Countywide lottery school should better reflect diversity of APS
If it isn't broke, don't fix it! Geographical distribution must be more equitable	
For each school. Keeps things fair	
What is the problem are you trying to solve? This process is needlessly complex with no discernable benefit. Just do a simple double-blinded lottery.
