Email: joshua.makely@apsva.us

The following questions and responses are made part of this Invitation to Bid:

Q1. For the fifty (50) switches, there will be two (2) transceivers per switch (per Addendum No. 1). What type of transceivers will be used and the quantity of each? 1G SX, 1G LX, 10G SR, or 10G LR?

A1. 1G SX, 2 per switch.

Q2. For the eighty (80) controllers, there will be four (4) transceivers per controller (per Addendum No. 1). What type of transceivers will be used and the quantity of each? 1G SX, 1G LX, 10G SR, or 10G LR?

A2. 1G SX, 4 per switch.

Q3. Per Addendum No. 1, it is stated that there is not enough licenses on the current controllers to support the additional devices. With that being said, you would need to also order quantity 2,200 Enterprise licenses (AP, PEF, RFP, AW) and 130 AirWave licenses (for 50 switches and 80 controllers). Will any of the existing available licenses on the Master Controller/AirWave Server be used or should we plan on quoting for the total 2200 Enterprise licenses and 130 AirWave licenses?

A3. APS is not seeking licenses in this ITB.

Q4. If additional licenses are needed, should we quote the licenses separately (there currently is not a section in the ITB to list pricing for licenses separately)? Or should we bundle the license cost into the Access Points, Switches and Controllers?

A4. APS is not seeking licenses in this ITB.
