### View your drug list online

This document was last updated 03/01/2018.\* To see a current list of the medications covered on your plan’s drug list, visit:

**The myCigna® website** – Once you’re registered, log in and select Estimate Health Care Costs, then select Get drug costs.

**Cigna.com/druglist** – Select your drug list name – Standard 3 Tier – from the drop down menu.

**Questions?** – Call the toll-free number on the back of your Cigna ID card. We’re here to help. If it’s easier, you can also chat with us online on the **myCigna** website, Monday–Friday, 9:00 am–8:00 pm EST.

\* Drug list created: originally created 01/01/2004

Last updated: 03/01/2018, for changes that were effective 07/01/2018

Next planned update: 03/01/2019, for changes that will be effective 07/01/2019

## Your prescription drug list

This document shows the most commonly prescribed medications covered on the Standard Prescription Drug List as of January 1, 2019.<sup>1</sup> All of these medications are approved by the U.S. Food and Drug Administration (FDA). Medications are listed by the condition they treat, then listed alphabetically within tiers or (cost-share levels).

**It's important to know that this is not a complete list of covered medications, and not all of the medications listed here may be covered by your specific plan.** You should log in to the **myCigna** website or app, or check your plan materials, to learn more about the medications your plan covers.

## How to read your drug list

Use the sample chart below to help you understand this drug list. **This chart is just an example.** It may not show how these medications are actually covered on the Standard Prescription Drug List.

| TIER 1<br>\$                            | TIER 2<br>\$\$  |
|---|-----------------|
| <b>BLOOD PRESSURE/HEART MEDICATIONS</b> |                 |
| afeditab CR                             | Berinert* (PA)  |
| amlodipine besylate                     | Bidil           |

|   | Ranexa (ST)     |
|   | Tekturna        |
|   | Tekturna HCT    |

**Tier** (cost-share level) gives you an idea of how much you may pay for a medication

Medications are grouped by the **condition** they treat

Medications are listed in **alphabetical** order within each column

**Specialty medications** have an asterisk (\*) listed next to them

Brand name medications are **capitalized**

Generic medications are **lowercase**

Medications that have extra coverage requirements will have an **abbreviation** listed next to them

This chart is just a sample. It may not show how these medications are actually covered on the Standard Prescription Drug List.

## Tiers

Covered medications are divided into tiers or cost-share levels. Typically, the higher the tier, the higher the price you'll pay to fill the prescription.

|  |                          |        |
|--|--------------------------|--------|
| › <b>Tier 1 - Typically Generics</b>             | (Lower-cost medication)  | \$     |
| › <b>Tier 2 - Typically Preferred Brands</b>     | (Medium-cost medication) | \$\$   |
| › <b>Tier 3 - Typically Non-Preferred Brands</b> | (Higher-cost medication) | \$\$\$ |

## Abbreviations next to medications

Some medications on your drug list have extra requirements before your plan will cover them.\* This helps to make sure you're receiving coverage for the right medication, at the right cost, in the right amount and for the right situation. These medications will have an abbreviation next to them in the drug list. Here's what each of the abbreviations mean.

|              |  |
|--------------|--|
| <b>(PA)</b>  | <b>Prior Authorization</b> – Cigna will review information your doctor provides to make sure you meet coverage guidelines for the medication. If approved, your plan will cover the medication.  |
| <b>(ST)</b>  | <b>Step Therapy</b> – Certain high-cost medications are part of the Step Therapy program. Step Therapy encourages the use of lower-cost medications (typically generics and preferred brands) that can be used to treat the same condition as the higher-cost medication. These conditions include, but are not limited to, depression, high blood pressure, high cholesterol, skin conditions and sleep disorders. Your plan doesn't cover the higher-cost Step Therapy medication until you try one or more alternatives first (unless you receive approval from Cigna). |
| <b>(QL)</b>  | <b>Quantity Limits</b> – For some medications, your plan will only cover up to a certain amount over a certain length of time. For example, 30mg per day for 30 days. Your plan will only cover a larger amount if your doctor requests and receives approval from Cigna.  |
| <b>(AGE)</b> | <b>Age Requirements</b> – You must be within a specific age range for your plan to cover the medication. Some medications aren't considered clinically appropriate for individuals who aren't within that age range.   |

\*This may not apply to your plan because not all plans have extra coverage requirements like prior authorization, quantity limits, Step Therapy and/or age. Please log in to the myCigna website or app, or check your plan materials, to find out if your plan includes these specific coverage requirements.

## Brand name medications are capitalized

In this drug list, brand name medications are capitalized and generic medications are lowercase.

## Specialty medications are marked with an asterisk

Specialty medications are used to treat complex conditions like multiple sclerosis, hepatitis C and rheumatoid arthritis. In this drug list, specialty medications are marked with an asterisk (\*). Some plans may cover these medications on a specialty tier, may limit coverage to a 30-day supply and/or require you to use a preferred specialty pharmacy to receive coverage. Please log in to the **myCigna** website or app, or check your plan materials, to learn more about how your plan covers specialty medications.

## No cost-share preventive medications are marked with a plus sign

Health care reform under the Patient Protection and Affordable Care Act (PPACA) requires that most plans cover certain categories of medications and other products as preventive care services. In this drug list, medications with a plus sign (+) next to them may be available to you at no cost-share (copay, coinsurance and/or deductible). Please log in to the **myCigna** website or app, or check your plan materials, to learn more about how your plan covers preventive medications.

## Plan exclusions

Your plan excludes certain types of medications or products from coverage. This is known as a “plan (or benefit) exclusion.” This means that your plan doesn’t cover any prescription medications in the drug class or to treat the specific condition. There’s also no option to receive coverage through a medication review process. In this drug list, these medications have a caret (^) next to them. Please log in to the **myCigna** website or app, or check your plan materials, to find out if your plan excludes your medication from coverage.

## How to find your medication

Find your condition in the alphabetical list below. Then go to that page to see the covered medications available to treat the condition.

| Condition                                | Page | Condition                            | Page   |
|--|------|--------------------------------------|--------|

^^ These medications need approval from Cigna before your plan will cover them. If your doctor feels an alternative medication isn't right for you, he or she can ask Cigna to consider approving coverage of the medication. If you don't get approval and you continue to fill this prescription, you'll pay the full cost of the medication out-of-pocket directly to the pharmacy.

## Prescription drug list FAQs

Understanding your prescription medication coverage can be confusing. Below are answers to some commonly asked questions.

### Why do you make changes to the drug list?

Cigna regularly reviews and updates the prescription drug list. We make changes for many reasons – like when new medications become available or are no longer available, or when medication prices change. We try to give you many options to choose from to treat your health condition. These changes may include:<sup>1</sup>

- › Moving a medication to a lower cost tier. This can happen at any time during the year.
- › Moving a brand medication to a higher cost tier when a generic becomes available. This can happen at any time during the year.
- › Moving a medication to a higher cost tier and/or no longer covering a medication. This typically happens twice a year on January 1<sup>st</sup> and July 1<sup>st</sup>.
- › Adding requirements to a medication. For example, requiring approval from Cigna before a medication may be covered or adding a quantity limit to a medication.

When a medication changes tiers or is no longer covered, you may pay a different amount to fill that medication. It's important to know that when we make a change that affects the coverage of a medication you're taking, we let you know before it begins so you have time to talk with your doctor.

### Why doesn't my plan cover certain medications?

To help lower your overall health care costs, your plan doesn't cover certain high-cost brand medications because they have lower-cost, covered alternatives which are used to treat the same condition. Meaning, the alternative works the same or similar to the non-covered medication. If you're taking a medication that your plan doesn't cover and your doctor feels an alternative isn't right for you, he or she can ask Cigna to consider approving coverage of your medication.

Your plan may also exclude certain medications or products from coverage. This is known as a

“plan (or benefit) exclusion.” For example, your plan excludes medications that aren't approved by the U.S. Food and Drug Administration (FDA).

### How do you decide which medications are covered?

The Cigna Prescription Drug List is developed with the help of Cigna's Pharmacy and Therapeutics (P&T) Committee, which is a group of practicing doctors and pharmacists, most of whom work outside of Cigna. The group meets regularly to review medical evidence and information provided by federal agencies, drug manufacturers, medical professional associations, national organizations and peer-reviewed journals medications about the safety and effectiveness of medications that are newly approved by the FDA and medications already on the market. The Cigna Pharmacy Management<sup>®</sup> Business Decision Team then looks at the results of the P&T Committee's clinical review, as well as the medication's overall value and other factors before adding it to, or removing it from, the drug list.

### Which medications are covered under the health care reform law?

The Patient Protection and Affordable Care Act (PPACA), commonly referred to as “health care reform,” was signed into law on March 23, 2010. Under this law, certain preventive medications (including some over-the-counter medicines) may be available to you at no cost-share (\$0), depending on your plan. Please log in to the **myCigna** website or app, or check your plan materials, to learn more about how your plan covers preventive medications. You can also view the PPACA No Cost-Share Preventive Medications drug list on [Cigna.com/druglist](http://Cigna.com/druglist).

For more information about health care reform, visit [www.informedonreform.com](http://www.informedonreform.com) or [Cigna.com](http://Cigna.com).

### Are medications newly approved by the FDA covered on my drug list?

Newly approved medications may not be covered on your drug list for the first six months after they receive FDA approval. These include, but are not limited to, medications, medical supplies or devices covered under standard

## Prescription drug list FAQs (cont)

pharmacy benefit plans. We review all newly approved medications to determine if they should be covered – and if so, at what tier level. If your doctor feels a currently covered medication isn't right for you, he or she can ask Cigna to consider approving coverage of the newly approved medication.

### How can I find out how much I'll pay for a specific medication?

You can use the Drug Cost tool on the **myCigna** website or app to estimate how much your medication may cost and view lower cost<sup>2</sup> alternatives, if available.

### How can I save money on my prescription medications?

You may be able to save money by switching to a medication that's on a lower tier (ex. generic or preferred brand) or by filling a 90-day supply, if your plan allows. You should talk with your doctor to find out if one of these options may work for you.

### What's the difference between brand name and generic medications?

The FDA requires generic medications to provide the same clinical benefit as its brand name versions.<sup>3</sup> The FDA also requires generic makers to prove that the generic works in the same way as the brand name medication. This means that generic equivalent medications must:<sup>3</sup>

- › Have the same active ingredient, strength and dosage form as the brand name medication
- › Deliver the same amount of active ingredients into the bloodstream in the same amount of time as the brand name medication
- › Be used in the same way as the brand name medication

Generics typically cost much less than brand name medications – in some cases, up to 85% less.<sup>3</sup> Just because generics cost less than brands, it doesn't mean they're lower-quality medications.

### How can I get help with my specialty medication?

Cigna Specialty Pharmacy can help you manage your health and prescription needs.<sup>4</sup> Their team of medical condition experts provide personalized, 24/7 support. They'll help you get approval for coverage of your medication, answer any questions you have about your medication and its cost, help you work through any side effects and make sure you have any supplies you need (at no extra cost). They'll also help you set up home delivery of your medication and give you information about financial assistance programs (if you need help paying for your medication). To learn more about the services they provide, please call **800.351.3606** or go to **Cigna.com/specialty-pharmacyservices**.

### Can I fill my prescriptions by mail?

Yes, as long as your plan offers home delivery.<sup>4</sup>

- › If you're taking a medication every day to treat an ongoing health condition like diabetes, high blood pressure, high cholesterol or asthma, you can order up to a 90-day supply through Cigna Home Delivery Pharmacy.<sup>SM</sup> To learn more, call **800.835.3784** or go to **Cigna.com/home-delivery-pharmacy**.
- › If you're taking a specialty medication to treat a complex condition like multiple sclerosis, hepatitis C and rheumatoid arthritis, you can fill your prescription through Cigna Specialty Pharmacy (our home delivery pharmacy). To learn more, call **800.351.3606** or go to **Cigna.com/specialty-pharmacy-services**.

### Where can I find more information about my prescription medication plan?

You can use the online tools and resources on the **myCigna** website or app to help you better understand your pharmacy benefits. You can view your drug list or search for a specific medication, use the Drug Cost tool to estimate how much your medication may cost, find an in-network pharmacy near you, review your pharmacy claims and payment history, and track Cigna Home Delivery Pharmacy<sup>4</sup> orders and request refills.

## Exclusions and limitations

Health benefit plans vary, but in general to be eligible for coverage a drug must be approved by the Food and Drug Administration (FDA), prescribed by a health care professional, purchased from a licensed pharmacy and be medically necessary. If your plan provides coverage for certain preventive prescription drugs with no cost-share, you may be required to use an in-network pharmacy to fill the prescription. If you use a pharmacy that does not participate in your plan's network, the prescription may not be covered. Certain drugs may require prior authorization, or be subject to step therapy, quantity limits or other utilization management requirements.

Plans generally do not provide coverage for the following under the pharmacy benefit, except as required by state or federal law, or by the terms of your specific plan:<sup>5</sup>

- › over-the-counter (OTC) medicines (those that do not require a prescription) except insulin unless state or federal law requires coverage of such medicines;
- › prescription medications or supplies for which there is a prescription or OTC therapeutic equivalent or therapeutic alternative;
- › doctor-administered injectable medications covered under the Plan's medical benefit, unless otherwise covered under the Plan's prescription drug list or approved by Cigna;
- › implantable contraceptive devices covered under the Plan's medical benefit;
- › medications that are not medically necessary;
- › experimental or investigational medications, including FDA-approved medications used for purposes other than those approved by the FDA unless the medication is recognized for the treatment of the particular indication;
- › medications that are not approved by the Food & Drug Administration (FDA);
- › prescription and non-prescription devices, supplies, and appliances other than those supplies specifically listed as covered;
- › medications used for fertility, sexual dysfunction, cosmetic purposes, weight loss, smoking cessation, or athletic enhancement;
- › prescription vitamins (other than prenatal vitamins) or dietary supplements unless state or federal law requires coverage of such products;
- › immunization agents, biological products for allergy immunization, biological sera, blood, blood plasma and other blood products or fractions and medications used for travel prophylaxis;
- › replacement of prescription medications and related supplies due to loss or theft;
- › medications which are to be taken by or administered to a covered person while they are a patient in a licensed hospital, skilled nursing facility, rest home or similar institution which operates on its premises or allows to be operated on its premises a facility for dispensing pharmaceuticals;
- › prescriptions more than one year from the date of issue; or
- › coverage for prescription medication products for the amount dispensed (days' supply) which is more than the applicable supply limit, or is less than any applicable supply minimum set forth in The Schedule, or which is more than the quantity limit(s) or dosage limit(s) set by the P&T Committee.
- › more than one prescription order or refill for a given prescription supply period for the same prescription medication product prescribed by one or more doctors and dispensed by one or more pharmacies.
- › prescription medication products dispensed outside the jurisdiction of the United States, except as required for emergency or urgent care treatment.

In addition to the plan's standard pharmacy exclusions, certain new FDA-approved medication products (including, but not limited to, medications, medical supplies or devices that are covered under standard pharmacy benefit plans) may not be covered for the first six months of market availability unless approved by Cigna as medically necessary.

**Cigna reserves the right to make changes to the Drug List without notice. Your plan may cover additional medications; please refer to your enrollment materials for details. Cigna does not take responsibility for any medication decisions made by the doctor or pharmacist. Cigna may receive payments from manufacturers of certain preferred brand medications, and in limited instances, certain non-preferred brand medications, that may or may not be shared with your plan depending on its arrangement with Cigna. Depending upon plan design, market conditions, the extent to which manufacturer payments are shared with your plan and other factors as of the date of service, the preferred brand medication may or may not represent the lowest-cost brand medication within its class for you and/or your plan.**

1. State laws in Texas and Louisiana may require your plan to cover your medications at your current benefit level until your plan renews. This means that if your medication is taken off the drug list, is moved to a higher cost-share tier or needs approval, these changes may not begin until your renewal date. To find out if these state laws apply to your plan, please call Customer Service using the number on the back of your ID card.
2. Prices are not guaranteed, and even though a price is displayed in the Drug Cost tool, it's not a guarantee of coverage. Your costs and coverage may change by the time you fill your prescription at the pharmacy, and medication costs at individual pharmacies can vary. Coverage and pricing may change. For example, your pharmacy's retail cash price for a specific medication may be less than the price shown in the Drug Cost tool.
3. U.S. Food and Drug Administration (FDA) website, "Generic Drug Facts." Last updated 06/04/18.
4. Not all plans are the same, so some plans may not include Cigna Home Delivery Pharmacy or Cigna Specialty Pharmacy. Please log in to the myCigna website or app, or check your plan materials, to learn more about the pharmacies in your plan's network.
5. Costs and complete details of the plan's prescription drug coverage are set forth in the plan documents. If there are any differences between the information provided here and the plan documents, the information in the plan documents takes complete precedence.
