The FY 2019-28 Capital Improvement Plan (CIP) contains two Career Center expansion projects:

- Additional 250 Arlington Tech seats for a total of 600 Arlington Tech seats by Sept. 2021
- Creation of 800 new high school seats by Sept. 2025

The concept design phase for the Career Center Expansion is planned to begin in September 2019 including meetings with the Building Level Planning Committee (BLPC) / Public Facility Review Committee (PFRC). The process will include planning for continued growth of the Arlington Tech program. The School Board is scheduled to act on the concept design in March 2020. The concept design will inform development of the FY 2021-30 CIP, with School Board adoption expected in June 2020.

https://www.apsva.us/design-and-construction/arlington-career-center/

Along the journey we’ve taken as a team, the following topics have been discussed:

Meeting No. 1: BLPC/PFRC Charge, Urban Design, CIP
Meeting No. 2: CCWG, Transportation Study
Meeting No. 3: Ed Specs, ACC Programs
Meeting No. 4: Design Exercise
Meeting No. 5: Bus and Parent Pick Up / Drop Off
Meeting No. 6: Parking
Meeting No. 7: Auto Tech/Collision, Community Programs, Service
Meeting No. 8: Concept Design Review

WHAT DO YOU THINK?
OVERVIEW

Educational Specifications (Ed Specs) provide criteria critical for project success including:

• Planning parameters
• Framework for expansion
• Square footage allocations for program spaces
• Space types
• Principles of school planning and design

The ACC Ed Specs:

• Were developed through a series of collaborative meetings with representatives from Department of Teaching and Learning, Arlington Career Center and Facilities and Operations.
• Reflect APS and ACC pedagogy
• Are adaptable to future instructional changes

SPACE PROGRAM AT A GLANCE

Space Program is organized by type. Each type includes (not limited to):

ACADEMIC
• Classrooms
• Labs
• Collaboration Areas
• Teacher Planning

ATHLETICS
• Competition Gymnasium
• Auxiliary Gymnasium
• P.E. and Locker Rooms
• Fitness and Health Rooms

ARTS & AUDITORIUM
• 500-Seat Auditorium
• Black Box Theater
• Visual & Performing Arts

AUXILIARY
• Library
• Student Dining
• Food Prep

ANCILLARY
• Technology Services
• Building Services

WHAT DO YOU THINK?
ACC EDUCATIONAL SPECIFICATIONS

CAPACITY SUMMARY

The chart below illustrates the calculation of total capacity using the variables of teaching stations, teacher-student-ratios and utilization factor. The difference between the planned enrollment of 1900 and the calculated capacity of 2194 students reflects an allowance of 294 seats for growth of CTE (from neighborhood HS), Academic Academy, EL and PEP programs.

2194 STUDENTS

FRAMEWORK FOR EXPANSION

These Ed Specs propose three pillars as the foundational elements of a Framework for Expansion of ACC. Together, they reflect what is already true for ACC and are represented here as sources of inspiration and opportunities for interpretation throughout the planning and design phases of the project.

ACC’S THREE PILLARS

COMMUNITY

ACC is part of the community it serves.

Relies upon strong relationships with school, business and higher education partners.

CONNECTED

Students and staff at ACC connected in common purpose and experience.

Different instructional programs and students are united as a community of learners.

CHANGE

ACC is on the path of transformation from the inside-out, characteristics of:

- ‘Not So Precious’
- Easily Adaptable
- Multi Functional
- Community-Oriented

...will continue to define its campus.

WHAT DO YOU THINK?

[Diagram and text related to ACC's three pillars and framework for expansion]
**TRANSPORTATION GOALS**

1) Provide and promote multi-modal options to help reduce the amount of driving to the Career Center
2) Create a safe campus for all modes of travel
3) Minimize traffic impact generated by the Career Center
4) Minimize parking costs of project
5) Minimize on-street parking conflicts
6) Provide efficient and convenient transportation options for APS families and staff
7) Minimize space dedicated to transportation on the Career Center campus

**BUS FACILITIES**

- **Elementary: Unchanged**
- **HS Option 1: On-site, split**
- **HS Option 2: On-site, shared**
- **HS Option 3: Curbside, 9th Street**

**PICK-UP/DROP-OFF FACILITIES**

- **HS Option 1: Curbside, 9th St**
- **HS Option 2: Curbside, Highland St**
- **HS Option 3: On-site, Garage**
- **HS Option 4: Curbside, Walter Reed Dr**
**PARKING**

**CHARGE**
Develop options and estimated costs for various options for on-site parking during the Concept Design phase, including:
1) No structured parking and accessible parking spaces only provided on site
2) A one-level 225 to 250-space, below-grade parking structure
3) A two-level 450 to 500-space, below-grade parking structure
4) Other parking solutions that may emerge during Concept Design

**Next steps:**
1) BLPC/PFRC recommends the preferred parking option(s) to the School Board
2) The School Board will approve a parking solution when it approves the Concept Design
3) The parking solution is ultimately approved by the County Board as part of the Use Permit

**COUNTY ZONING REQUIREMENTS**

</tr>
</tbody>
</table>

**PARKING ACCESS POINT(S)**

**Option 1:** In and Out on Highland St
- Can be combined with Option 3

**Option 2:** In on Highland St and Out on Walter Reed Dr
- Most likely right-out only

**Option 3:** In and Out on Walter Reed Dr
- Most likely right-in/right-out only
- Can be combined with Option 1

**Option 4:** In and Out on 7th St
- For above-grade scenarios (D1 & D2)
TRANSPORTATION AND PARKING

WHAT DO YOU THINK?
OVERVIEW

BLPC and PFRC committee members participated in a design charrette: a collaborative session to draft solutions to multiple design challenges. The ultimate goal was to generate visions of the future of ACC.

Utilizing the PFRC Principles of Civic Design, the CCWG Recommendations for massing and density, and ACC Educational Specifications as reference documents; committee members answered the following design challenges:

• Where should ACC’s front door be?

• What are the ideal locations for ACC’s primary community spaces (gym, auditorium, etc)?
  Thinking Shared Usage, Afternoon/Weekend Programs, Security.

• How will proposed massing relate to ACC’s phasing strategy?
  Thinking CCWG Zoning Recommendations, Sensibility to Existing Building.

TEAM PROPOSALS AT A GLANCE

TEAM 1
“pretty entrance”
“entrance at 9th and Walter Reed”
“library and library is the heart”
“green spaces on the roof”
“black box off site”
“underground parking”
“pedestrian path to field”
“pool underground”

TEAM 2
“glassy auditorium on 2nd floor”
“roof terrace”
“entrance at 9th and Walter Reed”
“shared program group along 9th street”
“CTE and core instruction on 3rd floor would help phasing”
“classroom in existing building”
“massing step up toward Walter Reed”
“CTE/auto tech along 9th st”

TEAM 3
“commons near where students comes in”
“art program close to entrance for community use”
“entrance at 9th and Walter Reed”
“gym close to field”
“terrace space”
“integrated core & CTE”
“auto tech along 9th”
“underground parking”
“pool outside the current built space for phasing”

TEAM 4
“entrance for pool”
“entrance for performance”
“entrance for gym”
“main entrance”
“entrance at 9th and Walter Reed”
“library look at green space”
“As many green space as possible”
“dining and culinary art close to each other”
“pool underground”
“CTE would be first phase, pool would be last phase”

TEAM 5
“performance and auditorium separate because of noise”
“entrance at 9th and Walter Reed”
“lot of value of collaboration of core instruction and CTE”
“no parking on site”
“gym and some CTE in separate building”
“green space”

WHAT DO YOU THINK?
REVEALING AREAS OF COMMON INTEREST

Front door should be in the vicinity of S Walter Reed and 9th Street, strengthening the connection to Columbia Pike!

Prominent Performing Arts along 9th. Multiple Approaches to Gym (Highland St and 9th). Pool: Connected to ACC or not.

Integration of CTE into Core Academics. Making CTE part of early phases of construction. Location of Autotech near Highland.

As much green area as possible. Ample terrace spaces. Access to natural light.

WHAT DO YOU THINK?
The amount of square footage (SF) needed to allocate the space program recommended in the ACC Ed Specs is calculated as follows:

\[
\text{370,832 SF (ED SPEC SPACE PROGRAM)} - \text{167,000 SF (EXISTING)} = \text{203,832 SF}
\]

**TO REMAIN** 167,000 SF

**TO BE REPLACED** 34,200 SF

**AREAS OF CONSENSUS**

2. Formal Entry at 9th St. and Walter Reed.
3. Bus loading/unloading along 9th St.
4. 8'-10' slope from Highland St to Walter Reed.
5. Tree Preservation.
6. Service Location.

**WHAT DO YOU THINK?**
