

SIDEWALK AUDIT DATA COLLECTION PROJECT BACKGROUND

APS SRTS Sidewalk Audit Data Collection Project is a unique activity designed for elementary school students (grades K-5) to help Arlington County inventory and assess its network of sidewalks, one block at a time.

We invite your student to join APS students around Arlington County in this “Citizen Scientist” project! The information you collect and share will help Arlington County update its sidewalk inventory, and plan improvements for the future.

We’ve designed a kid-friendly Sidewalk Audit checklist, available in two formats - as a printer-friendly, fill-in-the-blank hand-out and an online [Googleform](#). Directions for completing and submitting your answers are included in each version of the Sidewalk Audit Checklist.
