

Family Selection Process Results

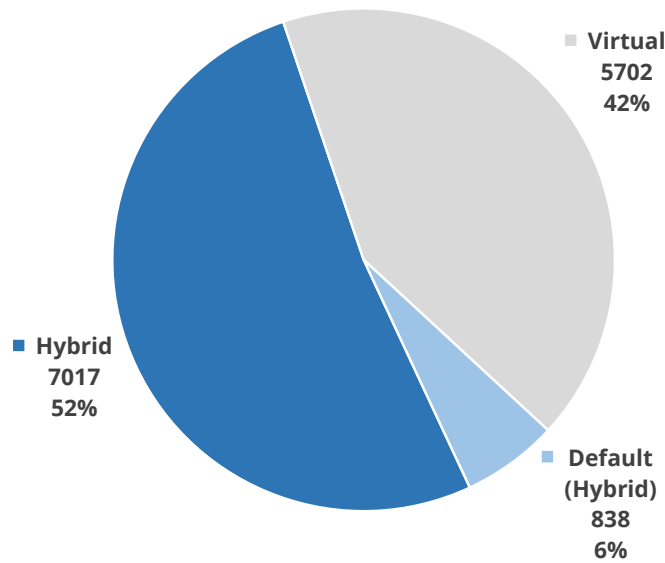

Return Level 2

October 2020

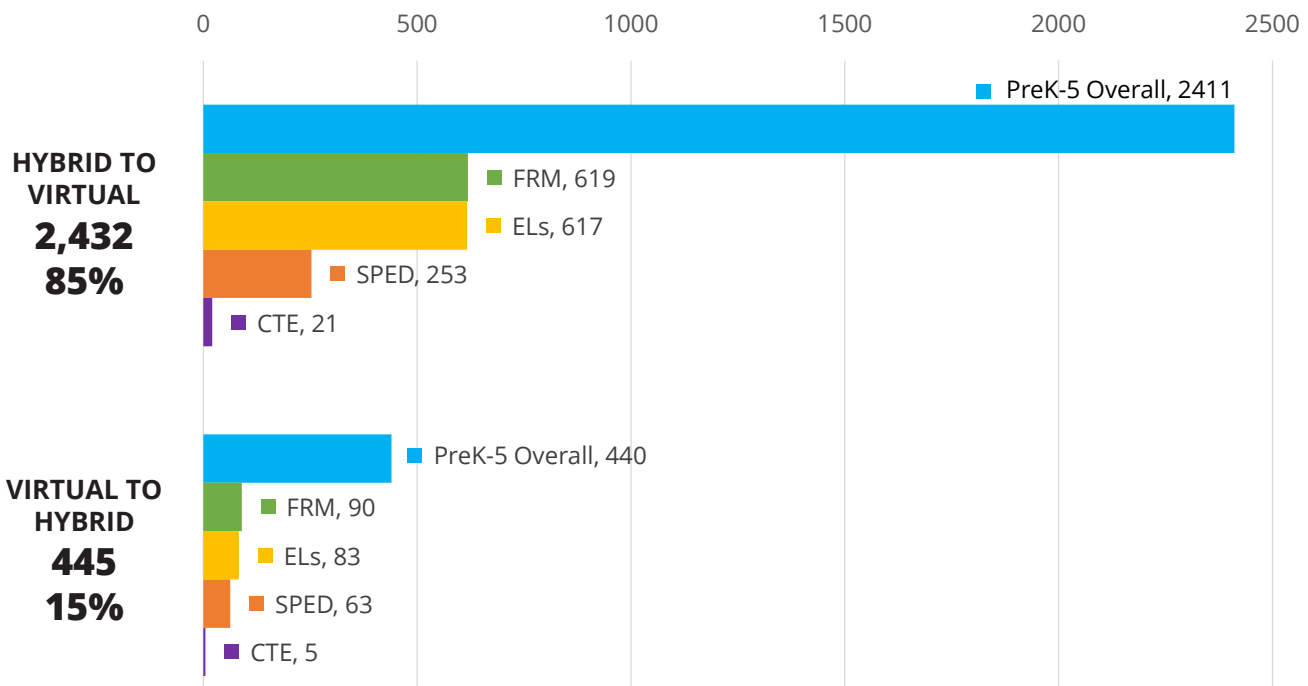

The family selection process for Level 2 students, which includes PreK-5th grade and CTE students enrolled in select Career Center courses, concluded on October 23. Families were able to choose a preferred instructional model—hybrid/in-person learning or full-time distance learning—and address transportation needs through ParentVUE. Families who had selected a model in July had the option to keep their previous selection or make a change. Families who did not select a model during either window defaulted to hybrid/in-person learning. APS is using this data to plan for Level 2 Return, including scheduling, bus routing and other preparations.

The charts below highlight the results, in particular the high percentage of families changing from hybrid to virtual, out of those who made a change.

**OVERALL LEVEL 2 BREAKDOWN
(13,557 TOTAL STUDENTS)**
