Assessment Notes:

The assessment notes will contain information to assist the parent(s)/guardian(s) with understanding the rating or scoring of individual standards. A student will receive “evidence of mastery” if there is evidence of mastery for **all** components within the curriculum framework for that grade-level. Answers alone are often not sufficient evidence for a standard. Please visit the VDOE website: *Standards of Learning Documents for Mathematics – Adopted 2016: Curriculum Framework* for a description of each standard for that grade-level.

Note from evaluator: The notes from the evaluator will include important notes and or recommendations for the home school provider if the portfolio is not approved or is approved with caution.

Assessment will be scored by:
