

Superintendent's Proposed Budget Fiscal Year 2027

February 26th, 2026

Sustaining Our Investment in Students, Staff and Schools
Recognizing Unmet Funding Needs

FY 2027 School Board Budget Direction

The budget should:

- **Align to the 2024-2030 Strategic Plan** performance objectives and strategies.
- **Prioritize recruiting, supporting, and retaining a high-quality and diverse workforce**, with a focus on competitive salaries and benefits in comparison with similar roles in the region.
- **Limit new funding requests to items specifically delineated to advance the performance objectives**, including changes to planning factors that address the urgency of improving educational outcomes for students with disabilities, English learners, and economically disadvantaged students
- **Identify opportunities for cost savings** via equity-based reductions, efficiencies, and realignment of funds whenever possible, rather than across-the-board percentage cuts.

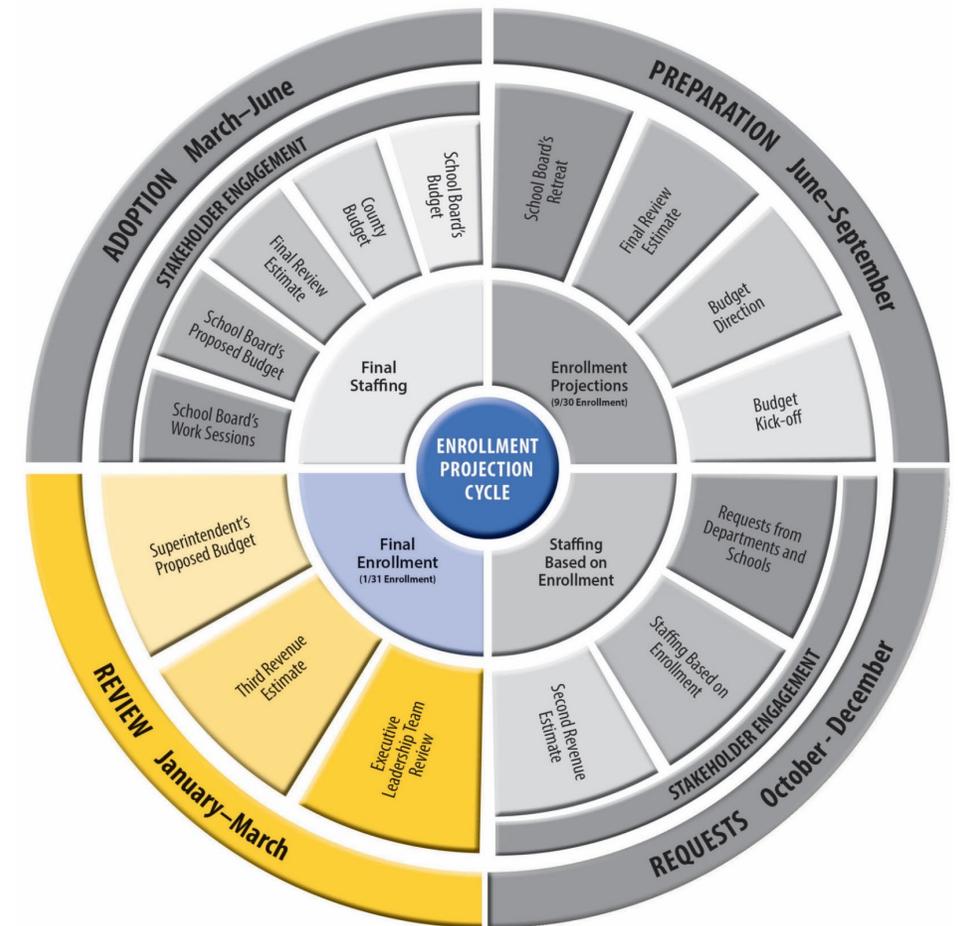

The School Board further directs the Superintendent to:

- **Provide detailed rationale for any budget investments, including anticipated outcomes**; alignment of outcomes with strategic performance objectives; how the outcomes will be measured and on what timeline.
- **Provide detailed rationale for any budget reductions**, including anticipated impact on students, staff, and/or schools; and how the reductions may inhibit progress on strategic performance objectives.
- **Minimize the use of general reserve funds for operating expenses**, consistent with the principle that one-time funds should be used only for one-time costs. For FY27, no more than 15% of the reserve funds used in the budget will go toward ongoing operating expenses, with the exception that the Compensation Reserve Funds may be used for compensation purposes.
- **Provide three-year forecasts of revenues and expenditures to gauge long-term financial sustainability.**

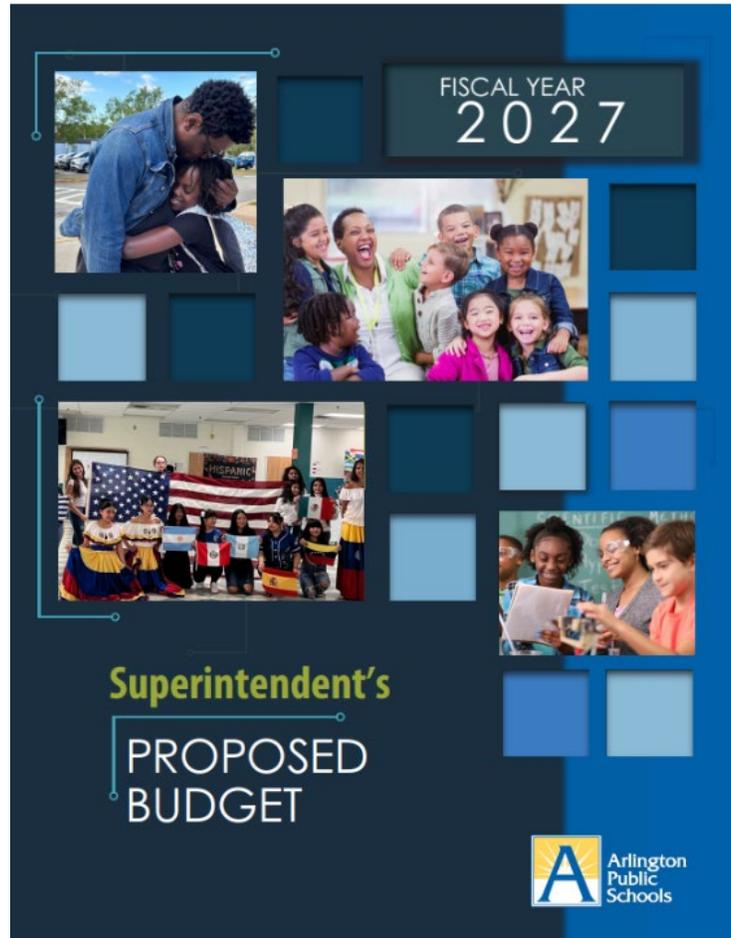

How We Built the Budget

- Compensation increase funded first
- Focus on funding for the School Board's Priorities
 - New budget requests limited to maintaining existing programs and services
 - Efficiencies in baseline budgets and increases aligned with the School Board's Priorities
- Limiting use of reserves in agreement with budget direction
